

# JAKE WOOD

[jæk.com](http://jæk.com)    [jake@jæk.com](mailto:jake@jæk.com)

I am a multidisciplinary designer and multimedia professional with a strong balance of creative vision and technical expertise. My background spans design, lighting, cinematography, and digital media production. I studied Dance at the University of Roehampton, where I specialised in Screendance, cinematography, and production design, later working there as a Theatre Technician. Since then, I have gained extensive hands-on experience in live events and technical production at venues including, but not limited to The Royal Albert Hall, The Savoy, The Old Vic, and The Lyric.

My work involves lighting and video design, programming, sound and visual operation, projection, 3D modelling, animation, and post-production editing. Alongside my professional roles, I have previously run an art collective and limited company, producing original media and commissioned works. With over a decade of experience in graphic design and visual communication, I bring a holistic approach to each project, uniting aesthetic sensitivity with problem-solving precision.

Having trained with, and performed alongside companies such as Jasmin Vardimon and Mathew Bourne's New Adventures, in my time as a Dancer, I understand both the creative and technical demands of performance and design. I aim to bridge these disciplines, transforming artistic ideas into engaging, functional, and visually cohesive experiences.

**Key skills:** verbal and visual communication, leadership, creative, IT skills, prototyping, problem solving, empathy, design, independent, team work.
